

Full Name	Abdelli Nasredine
------------------	-------------------

Brief Summary

The combination of *Java* and *JavaFx* (*GUI* Library) were used to implement Cesar Cipher. The *GUI* allows the user to do the following tasks:

- i. Read the content of a text file
- ii. Provide simple options concerning :
 - a. Algorithm choice (Cesar at the moment)
 - b. Operation mode (Encryption or Decryption)
 - c. Key
- iii. Encryption / Decryption
- iv. Save the output to a file

How to run

I provided a *Jar* file in the release section of my github repo¹, to run the app simply run `java -jar <name-of-jar-file>.jar` where *name-of-jar-file* is the name if the jar file.
